

October 30<sup>th</sup> 2018, Pisa

**International Workshop**

**Carbon Sequestration in Horticultural Crops**

*Aula Magna Storica, Scuola Superiore Sant'Anna*

*Programme*

---

**9:00** - Registration

**9:30** - Welcome address

**9:45** - Plenary Lecture: Following the carbon: from molecules to mountains - Phil Ineson, University of York, UK

**10:30** - Carbon fluxes in pomefruit and stonefruit orchards - Damiano Zanotelli and Massimo Tagliavini, Libera Università di Bolzano, Italy

**10:55** - Break

**11:15** - Carbon sequestration and partitioning in vineyards - Andrea Pitacco, Nadia Vendrame, Luca Tezza, Università di Padova, Italy

**11:40** - Carbon sequestration in olive orchards - Luca Testi, CSIC-Cordoba, Spain

**12:05** - Life Cycle Assessment, a balance between inputs and outputs. Focus on greenhouse vegetable production - Assumpció Antón, IRTA, Caldes de Montbui, Barcelona, Spain

**12:30** - Break

**14:00** - Impacts of global change on Mediterranean-type forest ecosystems and their carbon sequestration potential - Roberto Tognetti, Università del Molise, Italy

**14:25** - Closing the picture: the Carbon footprint of the apple from the field to the market - Damiano Zanotelli and Massimo Tagliavini, Libera Università di Bolzano, Italy

**14:40** - Using sap flow measurements to estimate assimilation rates of fruit trees - Álvaro López-Bernal, Omar García-Tejera, Luca Testi, Francisco Villalobos - Universidad de Cordoba, Departamento de Agronomía, Cordoba, Spain

**14:55** - CO<sub>2</sub> fluxes in two vineyards of Northern Italy: effect of soil management - Nadia Vendrame, Luca Tezza, Università di Padova, Italy

**15:10** - Conservation tillage and nitrogen fertilization affect soil aggregate distribution, carbon storage and enzymatic activities - Gaia Piazza, Elisa Pellegrino, Laura Ercoli - Institute of Life Sciences, Scuola Superiore Sant'Anna, Pisa, Italy

**15:25** - Discussion and Conclusions
